- Intel Apollo Lake-I SoC Processor (Default: E3940)
- Support 1\* SO-DIMM DDR3L-1866MHz up to 8GB
- All-aluminum body, produced by casting process
- Operating Temperature: -40 ~ 70°C
- 9~36V DC-in (Phoenix terminal connector)

|                 |                                                                                                                                                                                                                             |
